L'AGE DU BRONZE FINAL
A AUVERNIER

La Faculté des lettres de l'Université de Neuchâtel, sur les rapports de M. Edward Sangmeister, professeur à l'Université de Fribourg-en-Brisgau, de M. Michel Egloff, professeur à l'Université de Neuchâtel, et de M. Jean-Pierre Mohen, conservateur au Musée des Antiquités nationales de Saint-Germain-en-Laye, autorise l'impression de la thèse présentée par M. Valentin Rychner, en laissant à l'auteur la responsabilité des opinions énoncées.

Neuchâtel, le 23 juin 1978.

CATALOGUE ET PLANCHES

Avertissement

Le catalogue, volontairement sommaire, se propose seulement de compléter les données graphiques fournies par les planches, qui sont, le plus souvent, suffisamment parlantes en elles-mêmes. Pour chaque pièce on donne :

- la référence muséographique ;
- la mention éventuelle d'un élément descriptif qui ne serait pas traduit par le dessin ;
- la datation proposée dans la III^e partie du présent travail ;
- la bibliographie, qui, sans prétendre à l'exhaustivité, se limite essentiellement aux ouvrages déjà cités dans le texte.

Les mesures ne sont données que pour les objets représentés de façon incomplète (les épingles en particulier ; L = longueur en cm). L'aspect extérieur des vases ainsi que la nature et la grosseur du dégraissant sont décrits de façon générale dans la II^e partie (p. 21-22). Nous n'y revenons pas à propos de chaque pièce, d'autant plus que le même vase présente bien souvent toute une gamme de tons difficile à décrire brièvement et plusieurs états de surface différents dus, en particulier, à l'érosion. Il n'est pas non plus fait état de l'aspect extérieur des bronzes, qui est assez monotone. Quand ils n'ont pas été complètement nettoyés, les objets présentent encore leur patine lacustre, qui marie les tons gris, noirs, dorés, bruns et verts. Les dessins de poterie, enfin, ne traduisent que l'état de conservation des profils et représentent généralement les vases comme complets dans leur circonférence. Il faut savoir que celle-ci est très souvent incomplète, et que le diamètre du vase est alors reconstitué graphiquement, quelquefois à partir d'un fragment assez menu.

L'inexpérience initiale de l'auteur en matière de graphisme et la longue période (1970-1975) sur laquelle s'est échelonné le relevé du matériel expliquent les éventuelles carences du dessin ainsi qu'un léger manque d'unité dans la technique. Les dessins ont été réalisés en grandeur nature d'après les originaux, à l'exception des épingles dont les têtes ont été dessinées d'après des photos prises par nous et agrandies à l'échelle 2 : 1.

Les dessins, et spécialement ceux de la poterie, restent en partie schématiques, dans la mesure où ils représentent artificiellement les vases comme symétriques selon l'axe vertical et conservés dans la totalité de leur circonférence. Ils ne tiennent pas compte non plus des défauts mineurs et des états de surface, alors que certains décors, en partie effacés, sont reconstitués quand leur lisibilité le permet.

L'échelle de reproduction est indiquée pour chaque planche dans le catalogue. Elle est de 1 : 3 pour la poterie et presque toujours de 1 : 2 pour le bronze et les matériaux divers.

Toutes les planches sont de l'auteur, sauf :

- les dessins de moules en molasse, qui sont dus à Madeleine Aubert-Bornand (131/1 - 133/3 ; 134/1 - 137/4) et Jean-Luc Boisaubert (133/4) ;
- les dessins des couteaux conservés au MNS Zurich, exécutés d'après ceux de Jürg Rageth (108/8-9,11 ; 109/1,7,11 ; 110/1-5,8-9 ; 111/1-3,6-10,12 ; 113/1, 3-8 ; 114/2).
